MAXYAI

SAMPLE REPORT

AI READINESS & AUTOMATION ASSESSMENT

Assessment Summary Report

From siloed systems to a governed, AI-assisted back office.

PREPARED FOR
PT Arunika Kriya Nusantara

SECTOR
Export manufacturing · Home furnishings

ASSESSMENT PERIOD
September 2026

PREPARED BY
MAXY AI Transformation Team

Executive Summary

Arunika's finance, compliance and operations teams are capable, but much of their week goes into re-keying data between SAP Business One, government portals, Excel and WhatsApp. Of the 14 core workflow steps we mapped, 9 can be fully automated, 2 can be semi-automated with a person approving, and 3 should stay human-governed by design.

14	9	6–8 h	2.6 / 5
Workflow steps mapped across 3 departments	Steps fully automatable (rules or AI agent)	Est. daily admin time recoverable	Overall AI readiness: Developing

Headline findings

1. **Skilled staff act as manual data bridges.** The daily compliance packet alone (phone photos, WhatsApp transfers, hand-stitched PDFs) takes an estimated 3–4 hours.
2. **Systems hold the data; people re-key it.** SAP, Coretax and CEISA each hold what the next step needs, but nothing connects them.
3. **The foundations are ready.** Clean SAP master data and disciplined approvals mean automation can start without replacing any core system.

OUR RECOMMENDATION

Start with a 4-week pilot on document assembly and AP intake (high volume, low risk) and prove the savings before extending to tax and cash flow.

01 · CURRENT STATE

Where the Time Goes

We interviewed 11 staff across finance, tax, PPIC, warehouse and export compliance, and walked each workflow end to end. The pattern is consistent: the data already exists in a system, but it moves to the next system by hand.

AI READINESS SCORE

2.6 / 5

Developing

Top time drains

Workflow	Team	How it is done today	Frequency	Est. time
5-in-1 compliance packet	Finance & Tax	Phone photos sent over WhatsApp, then PDFs stitched by hand	Daily	**3–4 h**
Customer PO intake	PPIC	PDF, Excel and portal POs retyped into SAP	Daily	**1–1.5 h**
Stock & production checks	PPIC	SAP report export, then Excel VLOOKUP	Daily	**45 min**
Rolling cash flow	Finance	SAP payables aging copied into a master Excel	Weekly	**2–3 h**
VAT equalisation	Tax	Coretax and SAP tax lines matched with VLOOKUP	Weekly	**30–45 min**
Customs entry	Compliance	SAP deliveries re-keyed into CEISA	Per shipment	**20–30 min**
Billing receipts (TTPP)	Finance	About 95 receipts emailed to vendors one by one	Monthly	**≈ 6 h**

WHAT IS ALREADY WORKING

Clean master data. Vendors, items and goods receipts in SAP are well maintained.

Clear approvals. Payment and tax sign-off already follow a defined hierarchy.

Open team. Staff are comfortable with digital tools and want the repetitive work gone.

Time estimates come from staff interviews and workflow walk-throughs, not a formal time-and-motion study.

02 · AUTOMATION FEASIBILITY

What Can, and Shouldn't, Be Automated

Each workflow step was classified by how it can be automated, and where a person must stay in control for legal, security or quality reasons.

AUTO	AI-AUTO	HYBRID	HUMAN
8	1	2	3
Rules, database queries or APIs	AI agent reads documents and matches data	System prepares; a person submits	Human-governed by design

Workflow classification

#	Workflow step	Code	How
1	**Customer PO intake**	AI-AUTO	AI reads PDF/Excel POs into standard line items
2	**Stock & production check**	AUTO	Direct SAP query replaces exports and VLOOKUP
3	**Buyer portal booking**	HYBRID	AI drafts the manifest; staff submit it
4	**Export-quota reporting**	HYBRID	Volumes pre-filled from SAP; staff file it
5	**CEISA customs entry**	AUTO	Middleware maps SAP deliveries into CEISA
6	**Shop-floor quality check**	HUMAN	Physical inspection by trained craftspeople
7	**QA record sync**	AUTO	One bridge between internal and buyer QA
8	**Coretax portal login**	HUMAN	2FA/OTP-protected government portal
9	**5-in-1 compliance packet**	AUTO	Files stitched and archived automatically
10	**SAP AP invoice drafting**	AUTO	Drafts created against open goods receipts
11	**Billing receipts (TTPP)**	AUTO	Generated and emailed on SAP posting
12	**VAT equalisation**	AUTO	Reconciled; exceptions flagged for review
13	**Rolling cash flow**	AUTO	Live SAP view of weekly liabilities
14	**Payment release**	HUMAN	Cash disbursement stays with the CFO

THE HANDOVER RULE

Human-governed steps are a design choice, not a gap. On the tax portal, staff keep the 30-second 2FA login and download; the agent takes over from the download folder. Every automated step keeps an audit trail, and a person approves anything that leaves the company.

03 · RECOMMENDED SOLUTION

Six Modules, Four Phases

A modular toolkit that sits on top of existing systems, with no rip-and-replace. AI agents handle reading and judgement; software engines handle exact calculations.

AI AGENT

Agent 1 · AP Intake & Stamp Check

Reads delivery notes and POs, and visually confirms the warehouse stamp.

AI AGENT

Agent 2 · Compliance Packet

Assembles the 5-in-1 PDF and files it to the server and OneDrive.

AI AGENT

Agent 3 · Buyer PO Ingestion

Turns complex overseas POs with 20+ SKU variants into draft schedules.

AI AGENT

Agent 4 · Tax Equalisation

Matches SAP tax lines to Coretax and flags missing credits.

ENGINE

Engine A · Rolling Cash Flow

Live multi-currency view of payables, with weekly variance notes.

ENGINE

Engine B · Receipt Dispatch

Generates and emails billing receipts the moment SAP posts.

Phased roadmap

PHASE 1 · WK 1–4

Quick-win pilot

Agents 1–2, Engine B

Target: ~85% less time on document assembly; no files moved over WhatsApp.

PHASE 2 · WK 5–7

Financial governance

Agent 4, Engine A

Target: live cash forecast and automated VAT checks.

PHASE 3 · WK 8–10

Operational scale

Agent 3, CEISA bridge

Target: no duplicate customs entry; faster export scheduling.

PHASE 4 · WK 11–12

Team enablement

Applied AI training

Target: managers and finance able to run, monitor and extend the agents.

EXPECTED IMPACT · TARGETS, VALIDATED IN THE PILOT

3–4 h → <20 min

Daily compliance packet, review and approve only

Weekly → Live

Cash-flow visibility, refreshed straight from SAP

~95 → 0

Billing-receipt emails sent by hand each month

Want an assessment like this for your company?

MAXY's AI Assessment maps your workflows, scores your AI readiness and delivers a phased roadmap your team can act on.
